

### ***The National Earth Science Teachers***

**Association** is a nonprofit educational organization representing K-12+ teachers of the Earth sciences from across the country.

Founded in 1983, NESTA's purpose is the advancement, stimulation, extension, improvement, and coordination of Earth Science education at all educational levels.

NESTA seeks to help classroom teachers through services that bring high-quality educational materials and state-of-the-art research to them, as well as to provide an opportunity for engagement in an active professional community. NESTA services include:

- Our quarterly journal, *The Earth Scientist*;
- Our e-mail newsletter, *NESTA E-News*, that shares new resources, opportunities, alerts, and upcoming events;
- Annotated visuals for classroom use on CD;
- Our website, [www.nestanet.org](http://www.nestanet.org): which links members to numerous websites designed to enhance and aid classroom Earth science teachers;
- Regular elections for NESTA leadership, providing opportunities to serve;
- Sessions at NSTA national and regional meetings, including Share-a-thons, Earth and Space Science Resources Day, Field Trips, the Friends of Earth Science Reception, and other social events;
- Collaboration with educators, researchers, and scientists engaged in Earth science education projects through proposal opportunities;
- Provides members recognition as a member of a professional society.

We believe that the Earth sciences are unique among the sciences, offering unparalleled opportunities for interdisciplinary learning and application in a field inherently relevant to learners of all ages. K-12 preparation in the Earth sciences, prepares students to understand today's rapidly changing world. It offers experiences in a diverse range of scientific disciplines that have direct application to their lives.

Students who study the Earth science are prepared to make informed, responsible decisions about issues facing our present and future societies.

Join NESTA and become part of the premiere professional association dedicated to the improvement of Earth science education at the K-12 levels.

NESTA extends its influence through its affiliations with other professional associations.

NESTA is

- A Member Society of The American Geological Institute
- An Associated Society of The American Geophysical Union
- An Associated Society of The Geological Society of America
- An Associated Group of The National Science Teachers Association
- A Member of The Triangle Coalition

Earth science . . .Preparation for the Future

### **NESTA SLIDE AND DIGITAL PHOTO SETS**

The National Earth Science Teachers Association is pleased to offer photos of a broad range of topics for the Earth science classroom. These inexpensive sets, developed by NESTA members, are available as annotated photographic slide sets, or as digital photos with PowerPoints. Slide sets are being phased out, and are 10% off their original prices while they last. For a full listing of slide/photo sets and prices, or how you can contribute to this program, check the NESTA website or contact:
